

MIXBOX

"Imagine to win."

!! TRANSLATE WICH MICROSOFT TRANSLATOR

Thank you and welcome to you.

The MIXBOX is a simple and innovative method for your grids.

It is a method which allows to build your grid in the following way.

You have **pairs** of numbers (2 numbers together) as for example **14-29**

You only have to choose 2 pairs to make the first 4 numbers of your grid and you add your *personal number* to complete the composition of your combination.

Remains to put the luck number which... was lucky with you!

I imagined this method to try to win...

But see this more in detail below...

The method

To compose the first part of your grid to 5 numbers you just go:

Take 2 pairs and put them together and add *your personal number* which is the fifth issue, the fifth element!

Couples are arranged in the following way

Odd number + odd number example 9-41

Even number + even number example 20-34

Even number + odd number example 12-49

So you get each month a new array of pairs I designed specially, you simply have to assemble them.

And this eventually with a choice very limited combinations! What is a definite advantage!

Composition of a grid.

Take the Page with the table, print it out it is the simplest.

Taking the example of the above numbers: you decide to assemble 2 numbers with 2 odd numbers which gives you 20-34-9-41 and add you your personal number for example 46.

You see your grid 9 - 20 - 34 - 41 -46 on your official ballot, you add your number luck (whatever you want) and now it is gone!

You can take the couples in the same column to 4 odd or 4 pairs.

Council on the composition of a grid

You have several solutions to make your grates from the table on the MixBox.

- **The simplest random! I have already selected accurately couples so you can very well 'mix' at random.**

You can take into account the outputs the busiest on the odd peers.

- **Outputs the most common are 3 odd, 2 peers or 3 peers and 2 odd**
- **Then the outputs with 4 odd and 1 pair or vice versa 4 peers and 1 odd**
- **Finally the most rare with 5 odd or peers.**
- **You therefore have a very large selection of solutions to compose your grid as your personal number will determine which side leans the balance!**

You can follow 2 numbers. It is an output which happens almost once on two.

- **For example 25-26. So either with the choice of couples or with your number personal you can do this very easily.**

You can finally make the series. A series is 2 numbers ending with the same figure.

- **Example 15 and 45. This is a very common output also. Always in the same way, either by choosing 2 couples that make the case either with your personal number you dial your grid.**

This is thanks to the variety of couples and your personal number you can also imagine compositions to your liking. Make the connections between our energy, expertise and intuition seems to be a promising solution!

As soon as you have a gain to 3 numbers or more let us know please, it helps others and is a powerful incentive for all!

Very soon we announce your gain or even a jackpot it is what I wish you wholeheartedly!
