

# *How to win Euro Millions ? The best way is to use our system !*

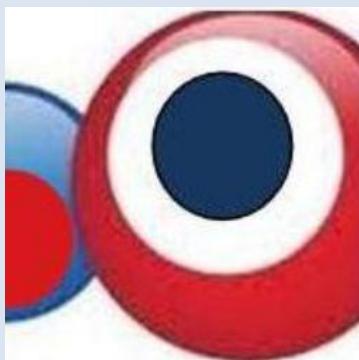

Our system allows you to have more chance of winning to Euro millions.

*gagnerloto.fr* 

*Hello,*

*We are pleased to present to you the English translation of our System for winning the EuroMillions. It works the same way regardless of the language and most importantly has the same excellent results ! You can have up to double the chance of picking the right numbers, which for jackpots of several million € is no small advantage !*

Finding the winning numbers for **Euro Millions** is a problem that every player encounters.

logo system

Regardless of the lottery, finding the winning numbers is a very difficult undertaking and chance is the sole master of the game ! Like everyone, would you like to find a technique, a method or a system to win the lotto ?

We have developed an excellent system ! It can be summed up in the following sentence :  
**“Knowing the right combination ahead of time is impossible. But having twice as much chance of picking the right numbers is possible !”**

Actually, luck is unpredictable and giving you the right numbers is impossible (and would be cheating). But other parameters of the game do not depend on luck : the amount of numbers per grid, the number of numbers to pick etc. It's with these parameters that we have “played” !  
**Conclusion : with our system you have as much as 2 times more chance of finding the winning numbers !**

**It's not rocket science, but a very good idea !**

*The PRINCIPLE OF THE SYSTEM*

*Winning the jackpot will remain exceptional, but our objective is something else. To start with, the winnings of 4 or 5 good numbers depending on the lottery. The jackpot would be a bonus !*

## **Testimonies**

### **Jerome's testimony :**

*“Happy New Year to everyone, after having won 50 Euros in December 2012, you have helped me win € 1306.40 Wednesday 02/2013, luck is not only for everyone else, thanks again.”*

### **Sylvie's Testimony**

*Hello, Sylvie here, and I wanted to let you know that I got 4 lottery numbers this Monday June 10th which won me 1,704 Euros thanks to your system by playing with 10 Euros, and I wanted to thank you.*

### **Jean-Luc's testimony**

*“Hello ! A quick note to say that I won the lottery on Saturday 19/01/2013. Once with 4 number and another time with 3 number using the System 25 series 5. It's a shame that I couldn't have all 5. The numbers 9/22/23/42/45. Lucky number 8. In the game I had 9/22/23 and in the other I had 22/23/42/45. Shame because I didn't have 5 winning with the lucky number, and no winning at number 5 either. Overall gain € 1884.10 Thanks !”*

## **How does the “System 25” work**

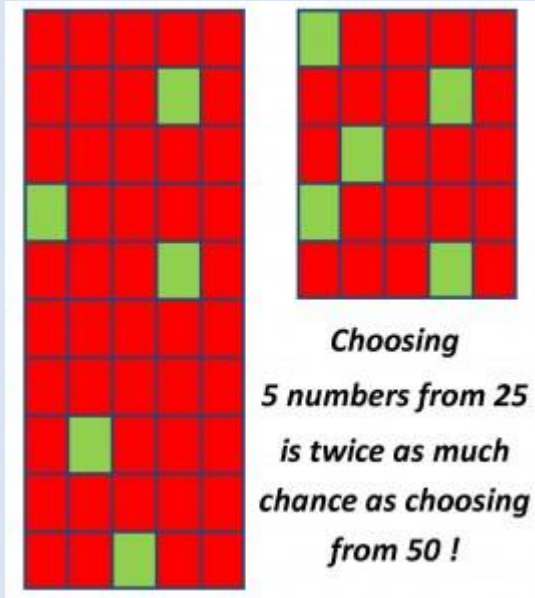

The idea that we found is simple, we designed it for the Euro Millions. To explain it we will use the example of this game with 50 number and 5 numbers to chose.

***Our system :*** *It's impossible to predict the winning number (chance). We said to ourselves, if we could chose the 5 number to pick, not only from the 50 normal numbers, but also from a “special series” of only 25 numbers, then, **automatically**, we will have 2 times as much chance of picking the right numbers !*

***If you can chose the 5 numbers to pick out of 25 numbers rather than 50 we have 2 times as much chance of finding the winning numbers! It's crazy but true !***

***The real advantage is based on the fact that our system is not based on luck. Any mathematician, regardless of where he comes from or even his era will attest to our system. “Choosing 5 numbers from 25 is twice as much chance as choosing from 50” And that's sure of being valuable for every draw.*** Look at this simple diagram because it's clearer. The

fewer boxes there are to tick the more chance we have of ticking the winni

ng numbers.

It's mathematics.

Of course you will play on the normal lottery tickets. Our grids with 25 boxes are actually one series of 25 numbers chosen.

What does one of our series look like ?

The normal series of the Euro starts like this

1-2-3-4-5-6-7-8-9 etc One series from our system has 25 numbers : it looks like this 3-4-5-7-9-10-12 etc...

*The advantage that our system has is considerable. Your chances of picking the right numbers are totally changed ! You will not bet like a normal player with our system ! And that's a considerable advantage !*

For our system to work, our series of 25 numbers must contain at least 4 winning numbers and ideally 5 winning numbers. What does our system do ? It very regularly contains 4 or 5 winning numbers ! That's exceedingly excellent !

With 5 winning numbers amongst our 25 numbers, you will have exactly double the chance of having ticked the right 5 numbers. And with 4 winning numbers you will have also had double the chance of ticking 4 numbers ! Simply put it's an enormous advantage, especially if there is 100 million or more in front of you ! *(You will find all our results from the draws below to attest to this)*

The chance to have as much as twice the luck of winning a jackpot of 50 or 100 million Euros is one big advantage, no ?

Emily's testimony !

*“I am writing you to say that after using your system for only 15 days, I have already won twice 3 numbers ! I really have a lot better luck, I am expecting a lot more and I believe in it. Thank-you and happy New Year.”*

**And, Jerome won more after his taking of € 1,306 !**

*“Good evening It's just to thank you for your services.....I am really happy to have discovered you site. Best luck for the future! I want to thank-you again in hopes that this continues.”*

## **Is one series of 25 numbers enough ?**

**We have 10 valid series which regularly obtain at least 4 or 5 good numbers in one series.**

Actually there are thousands of ways to make a series of 25 numbers, but we only had to develop a small number (10) which are very regular and have at least 4 or 5 good numbers in them. **All the difficulty is there and it's the choice of number from our series that make it useful.** Making a list of 25 numbers is very easy, but the fact that they regularly are made up of winning numbers is another challenge !

*The “System Euro millions” that you will receive is composed of 10 series of numbers. It's the optimal research of these numbers by the series which make our system so worthwhile. You don't need anything else and you will chose for yourself your numbers from our series to make your grids.*

***Our system does not give you the numbers to play, but can as much as double your chances of finding them ! That is a good goal to achieve !***

## **How to Play Using Our System**

Our systems is made up of 10 series of 25 numbers

Example of a series

**1-5-6-10-12-13-15-17-18-22-23-26-27-28-31-32-35-36-37-40-41-42-44-49-50**

You get optimum results by playing one grid for each of our ten series. But, you can do it differently if you like.

**This is how to play and it's very simple.**

You use the 10 series of numbers and lottery tickets or online to the National Lottery website

**In the first series you choose 5 numbers, randomly !**

**1-5-6-10-12-13-15-17-18-22-23-26-27-28-31-32-35-36-37-40-41-42-44-49-50**

And you use your 5 numbers for example **26-28-36-42-44** on the official lottery ticket. Remember to tick the stars which are not supplied with this system. You will notice that it's easier to tick the right numbers because you are only choosing from 25 numbers instead of 50.

**This combination which we have in our system has lead to a return of € 241 759,00 to the bettors who used it. (This is without counting the lucky number which can mean that you win the jackpot ;-)**

After that you do the same for all 10 series and that's all

**Our system does the work and, according to the draw, you will have twice as much chance of ticking the right numbers ! And even if you do it randomly.**

It is this paradox that is surprising : it's impossible to predict the right 5 numbers because chance cannot be predicted, but we still have to choose 5 ! **So perhaps still do it randomly, but with more luck !**

### **TWICE AS MUCH CHANCE OF WINNING CLICK HERE**

**Our system has an exceptionally good record of delivering results (see the draws below)**

**By playing a grid by series, with a total of 10 grids you will as much as double your chances of finding the winning numbers in at least one series ! (Example Euro Millions)**  
*This is a disadvantage because you have to bet more often, but small things as well, because for a little win of 4 numbers this is worth it ! A couple of million Euros speaks for itself ! (To be precise, playing 10 normal grids is not at all the same thing as playing 10 grids with our system : in the normal game you always have to chose amongst 50 numbers and 10 times in a row ! )*

### ***PROOF of the effectiveness of our "System 25"***

**Look at the results from the draw, we have always, with exception, 4 or 5 good numbers in the series ! This result means that our system works and that you will have ticked at least one of the grids with an enormous advantage and often doubled you luck !**

**Please note: The star numbers are not supplied**

***One of the series has at least 10...Updated with each draw the ratio as a guide for the winners !***
